## State of Texas Assessments of Academic Readiness (STAAR®) Performance Level Descriptors Grade 6 Mathematics

## **Performance Level Descriptors**

The mathematical process skills describe ways in which students are expected to engage in the content. They are not assessed in isolation but are incorporated into questions that assess grade 6 content. The process skills focus on applying mathematics to solve problems, analyze mathematical relationships, and communicate mathematical ideas.

## Students achieving Masters Grade Level Performance can

- Describe relationships between sets of rational numbers
- Model and solve one-variable, one-step inequalities
- Extend and apply geometry and measurement concepts to solve application problems

## Students achieving Meets Grade Level Performance can

- Represent and use rational numbers in a variety of forms
- Generate equivalent forms of fractions, decimals, and percents
- Solve application problems involving addition, subtraction, multiplication, and division of integers and multiplication and division of positive rational numbers
- Represent and solve application problems involving ratios and rates
- Solve application problems involving area and volume
